

# FANSAFETAG

## THE VISUAL INSPECTION SYSTEM TO ENSURE FAN OPERATIONAL SAFETY.

Often for portable fans it's not practical to fully commission the fan units every time they are used. Using the fansafetag system delivers the relevant checks to maintain a safe working environment alongside fully commissioned hazardous area equipment.

The tagging system provides an effective inspection procedure which identifies equipment's: Inspection due dates, Inspection records, asset identification, pre-use check list & safe use indicator.

The tagging system has an easy to fit holding bracket with a hardwearing weather proof detachable label suitable for all conditions. The labels can withstand temperatures from -40°C to +90°C and are used for both onshore & offshore installations.

Fansafetag makes tracking your assets easy & clear. Providing you with confidence the units are safe to use in its hazardous area.

- Easy to use
- Clear pre-use checks
- Inspection record
- Asset tagging
- Operating limits
- Inspection due date
- Safe use indicator
- Do not use indicator

FAN MUST BE INSPECTED BY A COMPETENT PERSON AND IN ACCORDANCE WITH THE DETAILED INSPECTION CHECKS LISTED OVERLEAF

DO NOT USE IF INSPECTION PERIOD HAS EXPIRED

**PRE-USE CHECK REMINDER**

- CHECK FOR OBVIOUS SIGNS OF DAMAGE
- ENSURE GUARDS ARE CLEAN
- ENSURE FAN IS GROUNDED TO EARTH
- ENSURE CLEAR AIRFLOW PATH THROUGH DUCT SYSTEM
- ENSURE A-V PADS ARE LEVEL AND STABLE
- CHECK FAN IS CORRECTLY CEILING
- ONCE RUNNING ENSURE NO OBVIOUS ABNORMAL MALFUNCTION

STOP FAN IMMEDIATELY IF ANY SIGNS OF MALFUNCTION ARE EXPERIENCED
